

Energy Code Technical Support Program

Program News & Updates

What's New In The Program

The Energy Code Support Hotline will continue to be: (855) 757-9717

The Massachusetts Program Administrators have selected [Performance Systems Development \(PSD\)](#) as the new lead vendor for the Mass Save Energy Code Technical Support Program.

PSD and their partners, [Leidos](#) and [the Institute for Market Transformation \(IMT\)](#) bring a wealth of experience in energy efficiency, building science, and building codes, and are excited to work with the Massachusetts code enforcement and construction communities.

The Mass Save Energy Code Technical Support Program has trained or provided technical assistance to thousands of code enforcement officials and construction industry professionals since 2014.

Over the next few years, the PSD team will be supporting residential and commercial building professionals through classroom trainings, webinars, project-specific support, an energy code technical support hotline and email address, and compliance tools like checklists, guides, and fact sheets.

Michael Turns

Senior Program Manager

mturns@psdconsulting.com

Michael Turns is a leading national expert in the International Energy Conservation Code, having developed and taught numerous training programs on three versions of the IECC. He has over 10 years of energy code training experience and has presented at national conferences like the RESNET Building Performance Conference, the DOE Energy Codes Conference, and AESP. Prior to joining PSD, he was the Associate Director of the Pennsylvania Housing Research Center (PHRC) at Penn State

Rakesh Koti

Energy Code Specialist

rkoti@psdconsulting.com

Rakesh has an engineering background and a master's degree in Energy Systems from the University of Illinois. At PSD, Rakesh delivers training programs to plan reviewers and field inspectors focusing on Residential Energy and Commercial Energy chapters of the IECC. Rakesh also develops training material and conducts on-site inspections. A certified ICC Residential Energy Inspector/Plans Examiner and LEED Green Associate, Rakesh also performs diagnostic tests such as blower door and duct leakage.
